Start Bootstrap 5 Example DEVELOPING Without Installations **Try Now** <div class="container-fluid p-5 bg-primary text-white text-center"> <h1>My First Bootstrap Page</h1> Resize this responsive page to see the effect! </div> <div class="container mt-5"> Support Included <div class="row"> <div class="col-sm-4"> <h3>Column 1</h3> **COLOR PICKER** Lorem ipsum dolor sit amet, consectetur adipisicing elit... Very tenim ad minim veniam, quis nostrud exercitation ullamco laboris... </div> <div class="col-sm-4"> <h3>Column 2</h3> Lorem ipsum dolor sit amet, consectetur adipisicing elit... Ut enim ad minim veniam, quis nostrud exercitation ullamco laboris... </div> <div class="col-sm-4"> <h3>Column 3</h3> **Get certified** Lorem ipsum dolor sit amet, consectetur adipisicing elit... by completing Very tenim ad minim veniam, quis nostrud exercitation ullamco laboris... a course today! </div> </div> </div> Try it Yourself » **Get started Bootstrap Versions** Bootstrap 5 (released 2021) is the newest version of Bootstrap (released 2013); with new components, faster stylesheet and more responsiveness. Bootstrap 5 supports the latest, stable releases of all major browsers and platforms. However, Internet Explorer 11 and down is not supported. **FOR A YEAR** The main differences between Bootstrap 5 and Bootstrap 3 & 4, is that Bootstrap 5 has switched to vanilla JavaScript instead of jQuery. Note: Bootstrap 3 and Bootstrap 4 is still supported by the team for critical bugfixes and documentation changes, and it is perfectly safe to continue to use them. However, new features will NOT be added to them. Why Use Bootstrap? Advantages of Bootstrap: • Easy to use: Anybody with just basic knowledge of HTML and CSS can start using Bootstrap • Responsive features: Bootstrap's responsive CSS adjusts to phones, tablets, and desktops • Mobile-first approach: In Bootstrap, mobile-first styles are part of the core framework • Browser compatibility: Bootstrap 5 is compatible with all modern browsers (Chrome, Firefox, Edge, Safari, and Opera). **Note** that if you need support for IE11 and down, you must use either BS4 or BS3. Where to Get Bootstrap 5? There are two ways to start using Bootstrap 5 on your own web site. You can: Include Bootstrap 5 from a CDN • Download Bootstrap 5 from getbootstrap.com Bootstrap 5 CDN If you don't want to download and host Bootstrap 5 yourself, you can include it from a CDN (Content Delivery Network). jsDelivr provides CDN support for Bootstrap's CSS and JavaScript: MaxCDN: <!-- Latest compiled and minified CSS --> <link href="https://cdn.jsdelivr.net/npm/bootstrap@5.2.3/dist/css/bootstrap.min.css"</pre> rel="stylesheet"> <!-- Latest compiled JavaScript --> <script src="https://cdn.jsdelivr.net/npm/bootstrap@5.2.3/dist/js/bootstrap.bundle.min.js"> </script> One advantage of using the Bootstrap 5 CDN: Many users already have downloaded Bootstrap 5 from jsDelivr when visiting another site. As a result, it will be loaded from cache when they visit your site, which leads to faster loading time. Also, most CDN's will make sure that once a user requests a file from it, it will be served from the server closest to them, which also leads to faster loading time. JavaScript? Bootstrap 5 uses JavaScript for different components (like modals, tooltips, popovers etc). However, if you just use the CSS part of Bootstrap, you don't need them. Downloading Bootstrap 5 If you want to download and host Bootstrap 5 yourself, go to <a href="https://getbootstrap.com/">https://getbootstrap.com/</a>, and follow the instructions there. Create Your First Web Page With Bootstrap 5 1. Add the HTML5 doctype Bootstrap 5 uses HTML elements and CSS properties that require the HTML5 doctype. Always include the HTML5 doctype at the beginning of the page, along with the lang attribute and the correct title and character set: <!DOCTYPE html> <html lang="en"> <head> <title>Bootstrap 5 Example</title> <meta charset="utf-8"> </head> </html> 2. Bootstrap 5 is mobile-first Bootstrap 5 is designed to be responsive to mobile devices. Mobile-first styles are part of the core framework. To ensure proper rendering and touch zooming, add the following <meta> tag inside the <head> element: <meta name="viewport" content="width=device-width, initial-scale=1"> The width=device-width part sets the width of the page to follow the screen-width of the device (which will vary depending on the device). The initial-scale=1 part sets the initial zoom level when the page is first loaded by the browser. 3. Containers Bootstrap 5 also requires a containing element to wrap site contents. There are two container classes to choose from: 1. The .container class provides a responsive fixed width container 2. The .container-fluid class provides a full width container, spanning the entire width of the viewport .container-fluid container Two Basic Bootstrap 5 Pages The following example shows the code for a basic Bootstrap 5 page (with a responsive fixed width container): Container Example <!DOCTYPE html> <html lang="en"> <head> <title>Bootstrap Example</title> <meta charset="utf-8"> <meta name="viewport" content="width=device-width, initial-scale=1"> <link href="https://cdn.jsdelivr.net/npm/bootstrap@5.2.3/dist/css/bootstrap.min.css"</pre> rel="stylesheet"> <script src="https://cdn.jsdelivr.net/npm/bootstrap@5.2.3/dist/js/bootstrap.bundle.min.js"> </script> </head> <body> <div class="container"> <h1>My First Bootstrap Page</h1> This part is inside a .container class. The .container class provides a responsive fixed width container. </div> </body> </html> Try it Yourself » The following example shows the code for a basic Bootstrap 5 page (with a full width container):
